DEPARTMENT OF STATE AND TREASURY
UNITED STATES OF AMERICA
FEDERAL RESERVE BOARD

(Circular No. 1, 1934)

Director, Federal Reserve Bank of New York	W. A. Rorer, D.D., F.R.S., F.R.S.E.
Chief, Internal Trade Branch	Robert S. Lytle, D.D., F.R.S.
Chief, External Trade Branch	F. B. Johnson, D.D.

REGULATIONS UNDER ACT OF OCTOBER 3, 1917
(Circular No. 1, 1934)

Under the general authority conferred upon the Federal Reserve Board by the Act of October 3, 1917, the Board has determined that the following regulations shall be observed by all banks and trust companies in the United States and its possessions and territories in connection with the issue and circulation of Federal Reserve Notes and Federal Reserve Checks.

With the exception of the Federal Reserve Bank of New York, all banks and trust companies in the United States and its possessions and territories shall observe the following regulations in connection with the issue and circulation of Federal Reserve Notes and Federal Reserve Checks.

A slight revision of the regulations governing the issue and circulation of Federal Reserve Notes and Federal Reserve Checks was made in 1934, and the revised regulations are hereby published for the information of all banks and trust companies in the United States and its possessions and territories.

Following is a table of the regulations governing the issue and circulation of Federal Reserve Notes and Federal Reserve Checks, as revised in 1934, and as they shall be observed by all banks and trust companies in the United States and its possessions and territories.

DEPARTMENT OF TRADE AND COMMERCE
DOMINION BUREAU OF STATISTICS - CANADA
INTERNAL TRADE BRANCH

(Issued July 8, 1935.)

Dominion Statistician:	R.H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.)
Chief, Internal Trade Branch:	Herbert Marshall, B.A., F.S.S.
Prices Statistician:	H.F. Greenway, M.A.

WEIGHTED INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Gold and general mining stocks respective indexes for the past week have reached their minimum since the week ending March 1, 1934. Consequently 23 mining issues dropped from 120.3 for the week of June 27th to 118.8 for the week ending July 4th. This index compared with 139.6 for the corresponding week in 1934.

With the exception of San Antonio and Teck-Hughes, all the gold stocks contributed to the fall of the gold index for the week ending July 4th, which was 112.1 as compared with 114.3 for the preceding week and 135.1 for the week ending July 5, 1934.

A slight rise was noticed in base metals placing the index at 149.0 for the week ending July 5th as compared with 162.8 for ^{the} same week in 1934, and 147.9 for the week ending June 27th, 1935

Following is a table of prices as compiled by the Dominion Bureau of Statistics comparing quotations for the week ending July 4, 1935, with those of the previous week and also with figures of July 5, 1934.

Prices Statistician:	H.F. Greenway, M.A.

WEIGHTED INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

After remaining firm for two consecutive weeks, the price index of twenty-three mining issues registered a minor decline placing the index at 133.1 for the week of January 2, 1936. The comparative index for the week of January 3, last year was 128.4.

A further loss was sustained by the gold series, the index being 116.7 for the week of January 2, as compared with 117.0 for the preceding week. This index was 128.2 for the corresponding period in 1935.

Although of small proportions, the upward movement was maintained in the base metals and the index mounted from 199.8 for the week of December 26, to 200.4 for the following week. For the week of January 3, 1935, this index was 132.7.

Appearing below is a table of figures, as computed by the Dominion Bureau of Statistics, giving the quotations for the weeks of January 2, 1936, December 26 and January 3, 1935.

WEIGHTED INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

The general index number for twenty-three mining stocks advanced on heavy turnover from 133.1 for the week of January 2 to 135.4 for the week of January 9. For the week of January 10, 1935, the index was 129.8.

Higher prices for the senior golds brought the index for this group up from 116.7 for the week ending January 2 to 118.3 for the week ending January 9. For the corresponding week of last year the index was 128.9.

The base metals group moved higher; the index advancing from 200.4 for the week of January 2 to 205.5 for the week of January 9. The comparative index for the last year was 137.2.

A table of average prices as computed by the Dominion Bureau of Statistics showing quotations for the weeks of January 9 and 2, 1936, and January 10, 1935, is listed below.

REVISION OF MINING STOCK PRICE INDEX NUMBER.

As a result of the regular year-end revision of the mining stock index, several issues have been replaced in the gold group in order to make it more representative of producing mines, whose price is affected only by their own production of gold. Base metals also has been removed from the base metal section.

Issues added:

Beattie, Central Patricia, God's Lake, Little Long Lake, and Pickle Crow.

Issues dropped:

Central Manitoba, Coniarum, Granada, Premier, and Base Metals.

DEPARTMENT OF TRADE AND COMMERCE
DOMINION BUREAU OF STATISTICS - CANADA
INTERNAL TRADE BRANCH

(Issued January 20, 1936.)

Dominion Statistician:	R.H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.)
Chief, Internal Trade Branch:	Herbert Marshall, B.A., F.S.S.
Prices Statistician:	H.F. Greenway, M.A.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

An appreciable gain of 5.8 points was registered for the price index of twenty-three mining issues for the past week, causing it to rise from 135.4 for the week of January 9, to 141.2 for the week of January 16. The index for the week of January 17, 1935, was 122.9.

Golds have acquired new strength with the major part of the stocks included in this group, showing activity and improvement in price. Accordingly the index of the gold series mounted from 118.3 for the week of January 9 to 124.0 for the week of January 16. The index for the comparable week last year was 121.9.

The substantial advance in base metals was mostly credited to Hudson Bay and Noranda. The index for this group was 211.8 for the week of January 16, as compared with 205.5 for the preceding week. This index was 130.4 for the corresponding period in 1935.

Appearing below is a table of figures, as compiled by the Dominion Bureau of Statistics, giving the quotations for the weeks of January 16 and 9, 1936, and January 17, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

The weighted price index of twenty-three mining issues reached 143.3 for the week of January 23rd, the same as that recorded for the week of September 6th, 1934, which was the highest level attained since 1928. For the week of January 24th, 1935, this index was 124.3.

Twenty golds moved higher, the index mounting from 124.0 for the week of January 16 to 125.7 for the week of January 23. The index for the comparable week last year was 123.0.

Base Metals moved another step forward, the index advancing from 211.8 for the week of January 16 to 215.6 for this week. This index was 133.0 for the corresponding period in 1935.

Appearing below is a table of figures, as compiled by the Dominion Bureau of Statistics, giving the quotations for the weeks of January 23 and 16, 1936, and January 24, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Interest in the mining stock market has continued and most of the issues recorded notable gains. Consequently the price index of twenty-three mining issues mounted from 143.3 for the week of January 23 to 149.9 for the week of January 30. This level represents the highest point attained since 1927. The index for the week of January 31, 1935, was 120.3.

With the exception of God's Lake, all of the gold stocks were higher. The index was 131.3 for the week of January 30, as compared with 125.7 for the previous week and with 119.0 for the corresponding period in 1935.

Base Metals recorded an advance of similar proportions, the index advancing from 215.6 for the week of January 23 to 226.2 for the following week. This index was 129.0 for the comparable week last year.

A table of average prices, as compiled by the Dominion Bureau of Statistics for the weeks of January 30 and 23, 1936, and January 31, 1935, is listed below.

Prices Statistician:	H.F. Greenway, M.A.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Inflationary rumours caused wide price fluctuations in the mining market during the past week. The index for twenty-three mining stocks registered a minor gain rising from 149.9 for the week ending January 30th to 150.3 for the week ending February 6 on heavy volume. For the same week last year this index was 120.5.

The gold group presented a mixed appearance. The junior golds were subjected to waves of buying and selling but the seniors held firm. The index was 131.1 for the week of February 6 as compared with 131.3 for the week of January 30. The corresponding index for last year was 119.4.

Prices in the Base Metals with the exception of Noranda were substantially higher. The index rose from 226.2 for the week of January 30 to 229.2 for the week of February 6. For the same period last year the index was 128.6.

Listed below is a table of average prices as compiled by the Dominion Bureau of Statistics for the weeks of February 6 and January 30, 1936, and February 7, 1935.

Prices Statistician:	H.F. Greenway, M.A.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

The price index of twenty-three mining issues reached in the first week of February its highest level since 1927, but sustained a moderate loss for the week of February 13. The index was 148.6 as compared with 150.3 for the preceding week. The index for the corresponding week in 1935 was 123.1.

Lower prices prevailed in the gold group, consequently the index declined from 131.1 for the week of February 6, to 129.7 for the week of February 13. The comparative index for the week of February 14, last year was 122.3.

A steady advance of seven weeks was interrupted when declining base metal prices caused the index for this group to drop from 229.2 for the week of February 6 to 226.3 for the following week. The index was 129.9 for the same week in 1935.

Appearing below is a table of average prices as computed by the Dominion Bureau of Statistics for the weeks of February 13 and 6, 1936, and February 14, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

The price index of twenty-three mining issues for the week of February 20, recovered most of the ground lost in the preceding week, the index being 150.2 as compared with 148.6 for the week of February 13. The index for the comparable week in 1935 was 126.1.

More than half of the stocks included in the gold group showed moderate increases, and the index mounted from 129.7 for the week of February 13 to 130.4 for the week of February 20. This index was 125.4 for the corresponding week last year.

The index for the base metals was 231.5 for the week at February 20, the highest level reached this year and it compares with 226.3 for the week of February 13. The index was 132.9 for the week of February 21, in 1935.

Listed below is a table of average prices as compiled by the Dominion Bureau of Statistics for the weeks of February 20 and 13, 1936, and February 21, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

The general price index of twenty-three mining stocks remained unchanged at 150.2 for the week of February 27. This index was 127.0 for the same interval of 1935.

Decrease in prices of gold issues in the latter part of the week, caused the index of this group to decline from 130.4 for the week of February 20 to 129.6 for the week of February 27. This index was 126.4 for the week of February 28 last year.

The upward trend which started ten weeks ago continued in base metals and the index reached 234.8 for the week of February 27 as compared with 231.5 for the preceding week. This index was 133.3 for the corresponding week in 1935.

Appearing below is a table of average prices as computed by the Dominion Bureau of Statistics for the weeks of February 27 and 20, 1936 and February 28, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

After remaining steady for two weeks, the price index of twenty-three mining issues for the week ended March 5, dropped back to 148.6 upon a par with the week of February 13. This index was 131.5 for the corresponding period, last year.

Gold stocks moved irregularly and the index declined from 129.6 for the week of February 27 to 127.7 for the week of March 5. The comparative index for the week of March 7, 1935, was 131.2.

Due to a slight decline in the price of Hudson Bay, the base metals index registered a fractional loss of 0.3 points, the first sustained since the week of December 19, 1935. The index was 234.5 for the week of March 5, as compared with 234.8 for the previous week and 137.1 for the week of March 7, 1935.

Following is a table of prices as compiled by the Dominion Bureau of Statistics comparing figures for the week of March 5 with those for the week of February 27, and also with the quotations for the week of March 7, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Following the lead of the Industrial section, the mining market fell off badly during the past week. The general index for twenty-three mining stocks dropped from 148.6 for the week ending March 5 to 144.8 for the week ending March 12. For the same week last year the index was 127.5.

The gold group bore the brunt of the selling wave, especially among the junior issues. The index for the week of March 12 was 123.8 as compared with 127.7 for the week of March 5 and 126.8 for the same period last year.

Losses among the base metals were not quite so impressive and the index for this group receded less than that for the gold group. The index was 230.9 for the week ending March 12 as compared with 234.5 for the week ending March 5. For the corresponding week last year this index was 134.6.

Listed below is a table of average prices as computed by the Dominion Bureau of Statistics for the weeks of March 12 and 5, 1936, and March 14, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS.
(1926=100)

The price index of twenty-three mining issues recently has lost much of the gain registered since the beginning of the year. The index for the week ending March 19, was 140.5 as compared with 144.8 for the preceding week and 126.2 for the comparable week in 1935.

Twenty gold stocks declined from 123.8 for the week of March 12 to 119.6 for the week of March 19. This index was 125.6 for the week of March 21, last year.

Base Metals followed the general current of the market, the index dropping from 230.9 for the week of March 12 to 226.1 for the week of March 19. The index for the corresponding week in 1935 was 133.1.

Appearing below is a table of average prices, as compiled by the Dominion Bureau of Statistics, for the weeks of March 19 and 12, 1936, and March 21, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Improvement in prices was evident in the mining section and the index of twenty-three mining issues partly regained the loss sustained in the preceding week, mounting from 140.5 for the week of March 19 to 143.2 for the week ending March 26. The index for the comparable week in 1935 was 127.6.

The level of gold issues during the month was roughly upon a par with that of last year for the same period. Thirteen golds showed appreciable gains and the index for this group was 121.2 for the week of March 26, as compared with 119.6 for the previous week. This index was 126.5 for the week of March 28, 1935.

Much activity was revealed in the base metals and after three weeks of gradual decline, the index advanced from 226.1 for the week of March 19 to 233.5 for the week of March 26. Noranda averaged \$50.40 for the past week, the highest price attained since October, 1929. The index for the corresponding week in 1935 was 136.3.

Listed below is a table of prices, as compiled by the Dominion Bureau of Statistics for the weeks of March 26 and 19, 1936 and March 28, 1935.

DEPARTMENT OF TRADE AND COMMERCE
DOMINION BUREAU OF STATISTICS - CANADA
INTERNAL TRADE BRANCH

(Issued April 6, 1936.)

Dominion Statistician:	R.H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.)
Chief, Internal Trade Branch:	Herbert Marshall, B.A., F.S.S.
Prices Statistician:	H.F. Greenway, M.A.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

The price index of twenty-three mining issues registered a fractional gain, placing the index at 143.8 for the week ending April 2, as compared with 143.2 for the previous week. This index was 126.3 for the week of April 4, 1935.

In spite of the fact that most of the gold stocks decreased in price, gains outweighed losses and the index for this group mounted from 121.2 for the week of March 26 to 121.4 for the week of April 2. The index for the corresponding week, last year was 124.1.

Further improvement occurred in base metals prices, the index advancing from 233.5 for the week of March 26 to 236.0 for the week of April 2. The index for the comparable period in 1935 was 139.2.

Appearing below is a table of prices, as computed by the Dominion Bureau of Statistics for the weeks of April 2 and March 26, 1936, and April 4, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

New interest was evident on the mining market and the general index mounted from 143.8 for the week of April 2 to 146.3 for the week of April 9. This index was 126.0 for the week ending April 11, 1935.

Although of small proportions, gains were registered for the majority of the gold issues. The index for this group was 122.2 for the week of April 9, as compared with 121.4 for the preceding week. The index for the corresponding week last year was 122.4.

A marked advance was recorded in the base metals, the index rising from 236.0 for the week of April 2 to 245.9 for the week of April 9. The index for the comparable week in 1935 was 144.2. The average weekly price for Noranda was \$54.05 a new high for this year.

Listed below is a table of prices, as compiled by the Dominion Bureau of Statistics for the weeks of April 9 and 2, 1936 and April 11, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

A slight increase in the general index of mining issues occurred during the brief three day trading period of the past week. The index mounted from 146.3 for the week of April 9 to 146.8 for the week of April 16. The index for the comparable week in 1935 was 128.9.

Gold prices fluctuated irregularly and the index registered a minor advance for the fourth consecutive week. This index was 122.5 for the week of April 16, as compared with 122.2 for the preceding week and 124.3 for the week of April 18 last year.

Due to the gain in price of Noranda the index of three base metals stocks rose from 245.9 for the week of April 9 to 247.2 for the week of April 16. The index recorded for the corresponding week in 1935 was 151.2.

Appearing below is a table of prices, as compiled by the Dominion Bureau of Statistics for the weeks of April 16 and 9, 1936, and April 18, 1935.

DEPARTMENT OF TRADE AND COMMERCE
DOMINION BUREAU OF STATISTICS - CANADA
INTERNAL TRADE BRANCH

(Issued April 27, 1936)

Dominion Statistician:	R.H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.)
Chief, Internal Trade Branch:	Herbert Marshall, B.A., F.S.S.
Prices Statistician:	H.F. Greenway, M.A.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

The price index of twenty-three mining issues declined from 146.8 for the week of April 16 to 146.2 for the week of April 23. This index was 131.3 for the week of April 25, 1935.

Prices of gold stocks confined themselves to variations of small proportions and although losses and gains were equally shared, the advances dominated the movement. The index mounted from 122.5 for the week of April 16 to 123.2 for the week of April 23. The index for the comparable week last year was 126.4.

The base metals failed to continue the advance started a month ago. The index dropped from 247.2 for the week of April 16 to 241.3 for the week of April 23. The index for the corresponding period in 1935 was 154.7.

Listed below is a table of prices, as compiled by the Dominion Bureau of Statistics for the weeks of April 23 and 16, 1936, and April 25, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Decreasing prices in the base metals group caused the general index of mining issued to drop from 146.2 for the week of April 23 to 144.1 for the week of April 30. The index for the comparable week in 1935 was 130.8.

The gain in price of a few gold stocks prevented the losses from affecting the index for this group which was 123.3 for the week of April 30, as compared with 123.2 for the preceding week. It was 125.3 for the corresponding period in 1935.

Base metals followed the current of industrials and registered a decline of 11.2 points. The index was 230.1 for the week of April 30. This compares with 241.3 for the week of April 23 and 156.4 for the week of May 2, last year.

Appearing below is a table of prices as compiled by the Dominion Bureau of Statistics for the weeks of April 30 and 23, 1936, and May 2, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

The price index of twenty-three mining issues registered an appreciable gain of 4.4 points during the past week, placing the index at 148.5, the maximum since March 5th. This index was 130.0 for the comparable week in 1935.

Revival of strength in prices of gold stocks caused the index for this group to advance from 123.3 for the week of April 30 to 127.4 for the week of May 7. The index for the corresponding week last year was 124.5.

Prices in the base metals with the exception of Falconbridge were substantially higher. The index was 235.9 for the week of May 7 as compared with 230.1 for the preceding week and 155.6 for the week ending May 9, 1935.

Listed below is a table of prices as computed by the Dominion Bureau of Statistics for the weeks May 7 and April 30, 1936, and May 9, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Mining stocks presented an unsettled appearance during the past week, although gains in price were more substantial than losses, and consequently the general index of twenty-three mining issues mounted from 148.5 for the week of May 7 to 149.4 for the week of May 14. The index for the corresponding week in 1935 was 129.6.

The upward tendency was maintained in the gold group, the index registering an advance for the eighth successive week. This index was 128.4 for the week of May 14 as compared with 127.4 for the preceding week. The index for the week ending May 16, last year was 123.3.

Owing to an increase in the price of Noranda, the base metals index moved higher from 235.9 for the week of May 7 to 236.4 for the week of May 14. The index for the comparable week in 1935 was 158.2.

Appearing below is a table of prices, as compiled by the Dominion Bureau of Statistics for the weeks of May 14 and 7, 1936, and May 16, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS

(1926 = 100)

The general index of mining issues attained 150.8, the maximum since 1927, surpassing by .5 the previous high level registered fifteen weeks ago. The comparative index in 1935 was 128.7.

Firmness in prices of the leading gold stocks was evident during the past week and the index advanced from 128.4 for the week of May 14 to 129.0 for the week of May 21. The index for the week of May 23, 1935, was 120.6.

All of the base metal stocks showed increases and the index was 241.1 for the week of May 21 as compared with 236.4 for the preceding week. This index was 164.2 for the corresponding week in 1935.

Listed below is a table of prices as compiled by the Dominion Bureau of Statistics for the weeks of May 21 and 14, 1936, and May 23, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

A further advance of 1.8 points was recorded in the general index of mining issues, the index being 152.6 for the week of May 28, as compared with 150.8 for the preceding week. This index was 124.8 for the week of May 30, 1935.

Although only half of the gold stocks responded to the upward impetus of prices, the index moved higher, registering a gain for the tenth consecutive week. The index mounted from 129.0 for the week of May 21 to 130.7 for the week of May 28. For the corresponding period, last year this index was 137.1. With the exception of Falconbridge, the base metal stocks showed increases in price. The index for this group was 243.6 for the week of May 28, as compared with 241.1 for the week of May 21 and 159.0 for the comparable week in 1935.

Appearing below is a table of prices as computed by the Dominion Bureau of Statistics for the weeks of May 28 and 21, 1936, and May 30, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

An advance of four points in the general index of mining issues placed this index at 156.6, and replacing last week's record for the period since the series was inaugurated in 1926. The comparative index for the week ending June 6, 1935, was 124.8.

With the exception of Beattie and God's Lake, all of the gold stocks were higher, some of them realizing gains of a substantial nature. The index for this group was 135.0 for the week of June 4, as compared with 130.7 for the preceding week and 117.9 for the corresponding week last year. This new high level brought the gold index to about the same position occupied in October, 1934.

A steady increase in prices for base metals issues during the past month, resulted in the index recovering most of the ground lost in the two final weeks of April. The index mounted from 243.6 for the week of May 28 to 246.3 for the following week. For the same interval in 1935 this index was 155.9.

Listed below is a table of prices as computed by the Dominion Bureau of Statistics for the weeks of June 4 and May 28, 1936, and June 6, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

The weighted price index of twenty-three mining issues mounted from 156.6 for the week of June 4 to 157.6 for the week of June 11. This index for the comparable week in 1935 was 124.8.

Only nine of the twenty gold stocks included in this group registered gains, which proved to be sufficient to continue the upward movement started twelve weeks ago. The index was 136.2 for the week of June 11, as compared with 135.0 for the preceding week and 117.6 for the corresponding week last year.

Due to a further advance in the price of Noranda, the index of the base metal issues maintained almost the same level. The index rose from 246.3 for the week of June 4 to 246.4 for this week. For the week ending June 13, 1935, this index was 156.9.

Appearing below is a table of prices as compiled by the Dominion Bureau of Statistics for the weeks of June 11 and 4, 1936, and June 13, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Influenced by recessions in the gold stocks, the general index of mining issues declined from 157.6 for the week of June 11 to 156.9 for the week of June 18. The index for the corresponding week in 1935 was 122.0.

A decline in prices of senior golds halted the steady rise, which had extended over a period of nearly three months. The index for this group was 135.2 for the week of June 18 as compared with 136.2 for the preceding week and 115.3 for the week of June 20, last year.

Continuation of the upward movement in base metals was due to the improvement in the prices of Falconbridge and Noranda, the index mounting from 246.4 for the week of June 11 to 247.1, for this week. This index was 152.1 for the comparable week in 1935.

Listed below is a table of prices as computed by the Dominion Bureau of Statistics for the weeks of June 18 and 11, 1936 and June 20, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Mining stock prices displayed a general downward tendency, which caused the index to decline from 156.9 for the week of June 18 to 154.9 for the week of June 25. This index was 120.3 for the week of June 27, 1935.

After a gradual advance of fifteen points in the past few months, the gold index sustained a loss for the second successive week, the index being 132.8 for the week of June 25, as compared with 135.2 for the preceding week. The index for the corresponding week last year was 114.3.

A drop in price of Hudson Bay outweighed gains registered for the other two base metal issues included in this group, the index decreasing from 247.1 for the week of June 18 to 246.7 for this week and 147.9 for the comparable week in 1935.

Appearing below is a table of prices as compiled by the Dominion Bureau of Statistics for the weeks of June 25 and 18, 1936, and June 27, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

The majority of prices of mining issues continued the downward course, commenced three weeks ago, resulting in the general index receding from 154.9 for the week of June 25 to 154.4 for the week of July 2. The index for the week of July 4, 1935 was 118.8.

The gold index represented by twenty stocks maintained practically the same level, due to a moderate advance in price of a few senior gold issues. The index was 132.9 for the week of July 2, as compared with 132.8 for the previous week and 112.1 for the corresponding period last year.

A loss of three points was recorded for the base metals, placing the index for this group at 243.7 for the week of July 2. The comparative index for the same week in 1935 was 149.0.

Listed below is a table of prices as compiled by the Dominion Bureau of Statistics for the weeks of July 2 and June 25, 1936 and July 4, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Improvement in gold stock prices was the main influence in raising the general index of mining issues from 154.4 for the week of July 2 to 155.3 for the week of July 9. The index for the comparable week in 1935 was 118.0.

Medium priced gold issues recorded gains of some importance and were responsible for the advance in this group, the index mounting from 132.9 for the week of July 2 to 134.2 for this week. For the week of July 11, last year this index was 110.8.

Lower prices for Falconbridge and Hudson Bay caused the index of base metals to decline for the third consecutive week. The index was 243.2 for the week of July 9, as compared with 243.7 for the preceding week and 150.1 for the corresponding period in 1935.

Appearing below is a table of prices as compiled by the Dominion Bureau of Statistics for the weeks of July 9 and 2, 1936, and July 11, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

A reactionary tendency in the gold group outweighed strength in the base metals causing the general index for twenty-three mining stocks to show a fractional loss. The index declined from 155.3 for the week of July 9 to 155.1 for the week of July 16. For the same period last year the index was 117.4.

The senior golds sold down during the week carrying the index for this group to 132.9 for the week ending July 16 as compared with 134.2 for the week ending July 9. This index was 109.4 for the week of July 18, 1935.

Base metals showed independent strength and the index gained 4.2 points, climbing from 243.2 for the week of July 9 to 247.4 for the week of July 16. The corresponding index for the week of July 18, 1935, was 152.2.

A table of average weekly prices as computed by the Dominion Bureau of Statistics is listed below for the weeks of July 16 and 9, 1936, and July 18, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Prices on the mining market advanced substantially during the past week carrying the index for twenty-three mining stocks to new high ground. The index was 159.0 for the week ending July 23 as compared with 155.1 for the week ending July 16, and 117.4 for the week ending July 25, 1935.

Leading issues in the gold group sold higher especially among the juniors. The index rose from 132.9 for the week of July 16 to 134.6 for the week of July 23. For the week of July 25, 1935, this index was 109.1.

Gathering momentum during the past two weeks the base metal stocks scored a major advance. A gain of 13.1 points from 247.4 for the week of July 16 to 260.5 for the week of July 23 was registered. The comparative index for July 25, 1935, was 153.4.

Appearing below is a table of average weekly prices as computed by the Dominion Bureau of Statistics for the weeks of July 23 and 16, 1936, and July 25, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

The noteworthy activity apparent last week continued throughout the seven day period ended July 30 and the general price index of mining issues mounted from 159.0 for the week of July 23 to 161.0 for the following week. The index for the comparable week in 1935 was 117.3.

Led by Beattie, Central Patricia, Little Long Lac, Pickle Crow, Pioneer and Siscoe, most of the gold stocks registered gains, resulting in the index rising from 134.6 for the week of July 23 to 136.0 for the week of July 30. For the corresponding week, last year this index was 109.2.

A further advance was recorded by the base metal stocks, the index being 265.2 for the week of July 30, as compared with 260.5 for the preceding interval and 154.8 for the week of August 1, 1935.

Listed below is a table of average prices as compiled by the Dominion Bureau of Statistics for the weeks of July 30 and 23, 1936, and August 1, 1935.

Prices Statistician: H.F. Greenway, M.A.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

After the rally of the past two weeks, the price index of twenty-three mining stocks sustained a fractional loss, the index declining from 161.0 for the week of July 30 to 160.4 for the week of August 6. The index for the comparable week in 1935 was 116.6.

Recessions in the gold group were quite general but the appreciable gain of \$2.32 for Dome was quoted as the main factor which prevented a drop of a larger proportion in the gold index. For the week of August 6 this index was 135.1 as compared with 136.0 for the previous week and 107.8 for the week ending August 8, 1935.

The advance in price of Noranda was said to be ^{the} favorable influence, which maintained the index of three base metals at the high level reached last week, the index registering a gain of .3. The index mounted from 265.2 for the week of July 30 to 265.5 for this week. This index was 154.3 for the corresponding week in 1935.

Appearing below is a table of average prices, as compiled by the Dominion Bureau of Statistics for the weeks of August 6 and July 30, 1936, and August 8, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Weakness on the mining market for the week of August 13 was indicated by the general index of mining issues which dropped from 160.4 for the week of August 6 to 155.5 for the following week. This index was 115.9 for the comparable week in 1935.

God's Lake and Siscoe were the only gold stocks to advance. The eighteen other stocks included in this group moved downward and the index declined from 135.1 for the week of August 6 to 132.9 for the week of August 13. For the corresponding period, last year this index was 107.1.

Base metals registered a fractional loss for the week of August 13, placing the index at 264.6. This index is still 17.2 points higher than for the comparative week in July. The index was 265.5 for the week of August 6 and 153.4 for the week of August 15, 1935.

Listed below is a table of weekly average prices as compiled by the Dominion Bureau of Statistics for the weeks of August 13 and 6, 1936, and August 15, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926 = 100)

The general index of mining issues declined from 158.5 for the week of August 13 to 158.1 for the week of August 20, when recessions in the gold group were a greater influence than gains in the base metals. The index for the week of August 22, 1935, was 115.1.

Notable advances were registered for Lake Shore, Siscoe and Wright-Hargreaves, but prices for more than two-thirds of the gold stocks were lower and caused the index to decline for the third successive week. The index fell from 132.9 for the week of August 13 to 132.0 for the following week. The comparative figure for last year was 105.3.

Base metals index came to the fore again, a new high level being reached by this index, due chiefly to Noranda which averaged \$63.97. This index was 266.4 for the week of August 20, as compared with 264.6 for the preceding week, and 156.4 for the corresponding week in 1935.

Appearing below is a table of weekly average prices, as compiled by the Dominion Bureau of Statistics for the weeks of August 20 and 13, 1936, and August 22, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

General apathy enveloped the market last week and the index for twenty-three mining stocks registered its fourth consecutive decline. The index was 156.7 for the week of August 27 as compared with 158.1 for the week of August 20. For the same period last year the index was 114.9.

No notable changes were recorded in the gold group, most issues moving downward. The index declined from 132.0 for the week ending August 20 to 131.2 for the week ending August 27. The corresponding index last year was 104.8.

A substantial loss in Hudson Bay more than outweighed gains in Falconbridge and Noranda, causing the index to fall from 266.4 for the week of August 20 to 262.5 for the week of August 27. This index was 157.4 for the week of August 29, 1935.

Listed below is a table of weekly average prices as computed by the Dominion Bureau of Statistics for the weeks of August 27 and 20, 1936 and August 29, 1935.

Prices Statistician:	H.F. Greenway, M.A.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Rousing from its lethargy of the preceding week the mining market registered advances all along the line. The general index for twenty-three mining stocks was 157.0 for the week of September 3 as compared with 156.7 for the week of August 27. This index was 116.6 for the same period last year.

The gold group showed numerous advances especially among the junior issues and the index rose from 131.2 for the week ending August 27 to 132.0 for the week ending September 3. For the week ending September 5, 1935, the index was 107.0.

Weakness in Noranda caused a decline in the index for base metals. The index fell from 262.5 for the week of August 27 to 260.9 for the week of September 3. The comparative index last year was 157.2.

A table of weekly average prices as computed by the Dominion Bureau of Statistics for the weeks of September 3, August 27, 1936, and September 5, 1935, is listed below.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

The mining market milled about uncertainly during the past week, unable to make much headway but yielding little ground. As a result the general index for twenty-three mining stocks remained stationery at 157.0 for the week ending September 10. This index was 119.3 for the week ending September 12, 1935.

Several specialties in the gold group broke through to higher ground but losses among the senior issues held the index down. A fractional increase from 132.0 for the week ending September 3 to 132.1 for the week ending September 10 was recorded. This index was 110.5 for the same period last year.

Hudson Bay was responsible for the base metal index showing a decline from 260.9 for the week of September 3 to 260.5 for the week of September 10. The comparative index last year was 156.6.

Listed below is a table of average weekly prices as computed by the Dominion Bureau of Statistics for the weeks of September 10 and 3, 1936, and September 12, 1935.

Figure 1. The effect of the concentration of the *Agrobacterium* strain on the transformation efficiency of *Agrobacterium* strain 101. The concentration of the *Agrobacterium* strain 101 was varied from 10 to 1000 cells/ml. The transformation efficiency was determined by the number of transformants per 100 cells. The data are the mean \pm SD of three independent experiments. The asterisk indicates a significant difference ($P < 0.05$) from the control.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Diversity in price movements was evident on the mining market during the past week, with gains or losses generally of moderate amounts. The index of twenty-three mining issues declined fractionally from 157.0 for the week of September 10 to 156.6 for the week ending September 17. This index was 121.4 for the corresponding week in 1935.

Twelve out of the twenty gold stocks registered declines and the index for this group receded from 132.1 for the week of September 10 to 131.7 for the following week. The index for the week of September 19, 1935, was 111.6.

From the high point of 266.4, reached in the middle of August the index of base metals has gradually declined to 259.9 for the week of September 17. This compares with 260.5 for the preceding week and 162.4 for the comparable period, last year.

Appearing below is a table of average weekly prices as compiled by the Dominion Bureau of Statistics for the weeks of September 17 and 10, 1936, and September 19, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

The noteworthy feature of the week on the mining section of the Toronto Stock Exchange was the accelerated upward movement of the base metals issues. It was the major factor responsible for the substantial gain of the general price index, which rose from 156.6 to 159.0 for the week ending September 24. This compared with 119.2 for the week of September 26, last year.

Advances in the gold group, although few, partly offset the declines of thirteen gold issues, with the result that the index was just a fraction lower than last week. The index fell from 131.7 for the week of September 17 to 131.6 for the following week. The comparative figure for the corresponding week in 1935 was 108.9.

Exceeding recent records, the index of the base metals registered a sharp rise of more than twelve points, attaining the new peak of 272.6 for the week of September 24. The index for the same period in 1935 was 162.1.

Appearing below is a table of average weekly prices as computed by the Dominion Bureau of Statistics for the weeks of September 24 and 17, 1936, and September 26, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

After a unsteady opening, mining stock averages were carried downward in the latter part of the week ending October 1 by lower prices in the gold section. The general price index declined from 159.0 for the week of September 24 to 157.7 for the succeeding week, while the comparative figure for the week of October 3, 1935, was 117.5.

Reflecting a weaker tendency, the gold group index registered a further drop from 131.6 for the week of September 24 to 129.3 for the week of October 1. This index was 106.2 for the corresponding week, last year. Senior golds dominated the downward movement while notable gains were recorded for Bralorne and Reno.

Base Metals continuing an irregular advance extending over the past two years reached a new high at 275.4 for the week of October 1, as compared with 272.6 for the preceding week. For the corresponding period last year this index was 164.5.

Listed below is a table of average weekly quotations as compiled by the Dominion Bureau of Statistics for the weeks of October 1 and September 24, 1936, and October 3, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
 (1925=100)

Continued strength in the base metal issues was sufficient to counteract sinking tendencies in the gold section with the result that the general index for twenty-three mining stocks held firm at 157.9 for the week of October 8 as compared with 157.7 for the week of October 1.

With one or two exceptions, notably Bralorne and Pioneer, the gold group drifted down to lower levels. The index was 127.7 for the week ending October 8, as compared with 104.7 for the same week last year and 129.3 for the week ending October 1, 1936.

The base metals index mounted from 275.4 for the week ending October 1 to 282.7 for the week ending October 8. On October 10, 1935, the index for this group was 171.8.

A table of average weekly prices as computed by the Dominion Bureau of Statistics for the weeks ending October 8 and 1, 1936, and October 10, 1935, is listed below.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Due to irregularly lower prices for gold stocks the general index for twenty-three mining issues received a set-back of over one point during the past week. The index was 156.8 for the week ending October 15 as compared with 157.9 for the week ending October 8. For the same period last year this index was 119.6.

The gold group lost ground for the third successive week, and the index is now back to early spring levels. It fell from 127.7 for the week of October 8 to 126.1 for the week of October 15 and was 106.8 for the week of October 17, 1935.

Optimism continued in the base metal issues and a further gain was registered for this group. The index rose from 282.7 for the week of October 8 to 283.6 for the week of October 15. The corresponding index last year was 172.6.

Listed below is a table of average weekly prices as computed by the Dominion Bureau of Statistics for the weeks ending October 15 and 8, 1936, and October 17, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Strength in both the gold and base metal groups during the past week sent the general index for twenty-three mining stocks into higher ground. The index advanced from 156.8 for the week of October 15 to 159.4 for the week of October 22. This index was 119.1 for the week of October 24, 1935.

The gold group reversed its trend of the past several weeks by registering a fractional gain. The index stands at 126.3 for the week ending October 22 as compared with 126.1 for the week ending October 15. The comparative index last year was 107.0.

Base metals again occupied the feature position in the market last week and recorded another substantial gain. Climbing from 283.6 for the week of October 15 to 296.0 for the week of October 22 the index gained 12.4 points. Last year this index was 169.2.

Immediately Below is a table of average weekly prices as computed by the Dominion Bureau of Statistics for the weeks of October 22 and 15, 1936, and October 24, 1935.

DEPARTMENT OF TRADE AND COMMERCE
DOMINION BUREAU OF STATISTICS - CANADA
INTERNAL TRADE BRANCH

(Issued November 2, 1936.)

Dominion Statistician:	R.H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.)
Chief, Internal Trade Branch	Herbert Marshall, B.A., F.S.S.
Prices Statistician:	H.F. Greenway, M.A.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

With the exception of a few specialties, prices on the mining market were generally softer during the past week. The index for twenty-three mining stocks last a fraction at 158.7 for the week of October 29, as compared with 159.4 for the week of October 22. The comparative index for last year was 119.1.

In spite of strength in several issues, principally San Antonio and Bralorne, the gold group index ended lower. It now stands at 125.7 for the week ending October 29 as compared with 126.3 for the week ending October 22 and 106.8 for the same period of last year.

Falconbridge was a strong spot among the base metal issues but was insufficient to counteract losses in the other two stocks included. A moderate decline of 0.8 carried the index down from 296.0 for the week of October 22 to 295.2 for the week of October 29. Last year the corresponding index was 170.2.

A table of average weekly prices as computed by the Dominion Bureau of Statistics for the weeks of October 29 and 22, 1936, and October 31, 1935, is listed below.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Trading in the mining market assumed boom proportions during the past week. Prices in both gold and base metal issues were strong, buoyancy in base metals being particularly marked. The index for twenty-three mining stocks rose from 158.7 for the week of October 29 to 161.8 for the week of November 5, 1936. Last year the comparative index was 120.7.

With the exception of the British Columbia issues, the gold group staged a recovery movement over a broad front. For the week ending November 5, the index was 127.2 as compared with 125.7 for the week ending October 29 and 107.6 for the same period last year.

Turning over in heavier volume, base metal stocks occupied a prominent position in the current market rally. Advancing from 295.2 for the week of October 29 to 304.7 for the week of November 5 the index gained 9.5 points. The comparative index for November 7, 1935, was 174.8.

Immediately below is listed a table of average weekly prices as computed by the Dominion Bureau of Statistics for the weeks of November 5 and October 29, 1936, and November 7, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Both the gold and base metal issues continued to forge ahead strongly during the past week. The general index for twenty-three mining stocks advanced sharply from 161.8 for the week of November 5 to 167.6 for the week of November 12. The comparative index last year was 124.8.

With interest centred mainly in the senior issues the gold trend was decidedly upward. The index for the week of November 12 was 131.9 as compared with 127.2 for the week of November 5, 1936, and 111.5 last year.

Despite profit taking during the latter part of the week the base metal stocks were able to hold a substantial gain. The index now stands at 314.9 for the week of November 12 as compared with 304.7 for the week of November 5. The corresponding index last year was 179.8.

A table of average weekly prices as computed by the Dominion Bureau of Statistics for the weeks of November 12 and 5, 1936, and November 14, 1935, is listed below.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Prices on the mining market were generally firmer during the past week with a few issues, mostly among the senior golds, moving higher. The general index for twenty-three mining stocks advanced from 167.6 for the week of November 12 to 169.2 for the week of November 19. For the corresponding week last year this index was 126.6.

With the senior gold stocks paving the way, the index for this group moved up 2.0 points. The index stands at 133.9 for the week ending November 19 as compared with 131.9 for the week ending November 12, and was 112.5 for the same period last year.

Noranda was a feature among the base metal issues and was responsible for advancing the index for this group from 314.9 for the week of November 12 to 315.1 for the week of November 19. This index was 184.4 for the same week of 1935.

Immediately below is listed a table of average weekly prices as computed by the Dominion Bureau of Statistics for the weeks of November 19 and 12, 1936, and November 21, 1935.

Prices Statistician:	H.F. Greenway, M.A.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Following the lead of the industrial section prices on the mining market were irregularly lower last week. The general index for twenty-three mining stocks declined from 169.2 for the week of November 19 to 168.3 for the week of November 26. For the same period last year this index was 129.9.

With the exception of one or two issues, notably Macassa and San Antonio which advanced against the trend, losses were prevalent in the gold group. The index stood at 133.0 for the week ending November 26 as compared with 133.9 for the week ending November 19, 1936, and 115.6 for the corresponding week last year.

In spite of substantial strength in Hudson Bay, the index for the base metal issues closed lower at 314.4 for the week of November 26 as compared with 315.1 for last week. The corresponding index last year was 188.6.

A table of average weekly prices as computed by the Dominion Bureau of Statistics for the weeks of November 26 and 19, 1936, and November 28, 1935, is listed below.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Price changes on the mining market were narrow during the past week. The general index for twenty-three mining stocks was down a fraction at 168.2 for the week ending December 3 as compared with 168.3 for the week ending November 26. For the same period last year this index was 131.5.

In the gold group senior issues were weaker but strength in the junior stocks counteracted this and the index remained unchanged at 133.0 for the week of December 3. The corresponding index last year was 115.3.

Base metal issues, with the exception of Hudson Bay which had a good gain, averaged lower. The index for this group was carried down from 314.4 for the week of November 26 to 313.6 for the week of December 3. This index was 197.4 for the corresponding week last year.

A table of average weekly prices as computed by the Dominion Bureau of Statistics for the weeks of December 3 and November 26, 1936, and December 5, 1935, is listed below.

Prices Statistician:	H.F. Greenway, M.A.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Generally lower prices featured the mining stock market during the past week and the index series of mining issues receded from 168.2 for the week of December 3 to 164.4 for the following week. This index was 136.7 for the week of December 12, last year.

Unchanged at 133.0 for two weeks in succession, the gold index sustained quite a heavy loss, when it dropped to 129.9 for the week ending December 10. Leading the decline were Bralorne, Dome, Lake Shore, Macassa, McIntyre, Pioneer and San Antonio. The comparative index in 1935 was 118.2.

Base metals moved into higher ground in the final days of the week, but their gains failed to offset previous recessions and the index for this group fell from 313.6 for the week of December 3 to 306.9 for the week of December 10. The figure for the corresponding period last year was 211.7.

Appearing below is a table of average weekly prices, as compiled by the Dominion Bureau of Statistics for the weeks of December 12 and 13, 1936, and December 12, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Activity continued in the mining section of the Canadian stock market, with both gold and base metals groups showing marked gains. The general index of twenty-three mining issues mounted from 164.4 for the week of December 10 to 168.3 for the week of December 17. This index was 133.3 for the corresponding period in 1935.

Up to Tuesday, December 15, each day brought new increases for the gold stocks, but on the following days, conflicting trends appeared. At the end of the week, gains and losses were about equally divided. As the result the index of the gold stocks advanced from 129.9 for the week of December 10 to 131.4 for the week of December 17. The index was 117.2 for the same week in 1935.

Base metals stocks figured prominently in the upward movement with pronounced gains in this group reflecting further increases in actual base metal prices. The index attained 320.5 for the week of December 17, the maximum for this year, as compared with 306.9 for the preceding week. The comparable figure for the week of December 19, last year was 199.3.

Listed below is a table of average prices, as computed by the Dominion Bureau of Statistics for the weeks of December 17 and 10, 1936, and December 19, 1935.

Prices Statistician:	H.F. Greenway, M.A.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Activity in mining issues declined with the approach of the holiday season. Although a firmer tendency was manifested in the latter part of the week, the index of twenty-three mining issues declined fractionally to 167.7 for the week of December 24, as compared with 168.3 for the week of December 17. This index was 133.3 for the corresponding week in 1935.

Several senior gold stocks registered moderate declines while the majority of other issues moved higher. Their gains failed to maintain the index which dropped from 131.4 for the week of December 17 to 130.4 for the following week. For the week ending December 26, last year this index was 117.0.

Base metals were firm, but with no particular features. The index for this group mounted from 320.5 for the week of December 17 to 321.8 for the week of December 24. The comparable figure for the same week in 1935 was 199.8.

Appearing below is a table of average prices, as compiled by the Dominion Bureau of Statistics for the weeks of December 24 and 17, 1936, and December 26, 1935.

WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Activity in the mining market broadened out considerably during the closing week of the year. The general index for twenty-three mining issues climbed to its highest point for 1936 at 170.3 for the week ending December 31 as compared with 167.7 for the week ending December 24. The corresponding index last year was 133.1

With junior issues leading the way prices in the gold section recorded numerous gains. The index rose from 130.4 for the week of December 24 to 133.6 for the week of December 31. The comparative figure last year was 116.7.

The base metal stock index moved forward at a less rapid pace marking up a minor gain of 0.3 points to reach 322.1 for the week of December 31. It was 200.4 for the final week of last year.

Listed below is a table of average weekly prices as compiled by the Dominion Bureau of Statistics for the weeks of December 31 and 24, 1936, and January 2, 1936.

WEIGHTED PRICE INDEX NUMBERS OF 24 MINING STOCKS
(1926=100)

Prices in both the gold and base metal issues mounted during the opening days of the year and the general mining stock price index closed the week of January 7, 1937, at 172.1, an all time record. This compares with 170.3 for the preceding week and 135.4 for the corresponding period in 1936.

A fair display of strength appeared in golds, largely attributed to higher prices for the junior issues. Although a slight weakness was apparent on the final day of the week, the gold index registered an appreciable gain, the index rising from 133.6 for the week of December 31 to 135.8 for the week of January 7. This index was 118.3 for the week of January 9, 1936.

Fluctuations were narrow in the base metals group but prices were slightly firmer. The index moved upward from 322.1 for the week of December 31, to 322.3 for the following week. The comparable figure, last year was 205.5.
